Re: MOA Application Form
Tank T408-6 (Block 408)
University Heights - Sites C & E

Dear Mr. Skye:

Enclosed please find a draft copy of the Memorandum of Agreement (MOA) Application completed for the remediation conducted in relation to the discharge from the underground storage tank located on Block 408 near the corner of Newark Street and Academy Street on the C & E site. As discussed, execution of an MOA with the Department will be necessary to close the spill case resulting from the reported release from this tank.

Please review the application form and, if acceptable, have each of the two (2) certifications on the last page of the application signed and notarized. An explanation of the required signatures is provided on the certification page. Once this document has been signed and notarized, please return the original, signed form to my attention at your earliest possible convenience. I will prepare the final application form for submittal to NJDEP.

As you will notice, the information provided on the form is general. However, as indicated in Part II, Item C, we are requesting NJDEP oversight of only the specific remedial action activities completed with regard to the tank at this location. Once the MOA has been finalized, we will prepare and submit the Remedial Action Report (RAR).

Should you have any question, or require additional information with regard to this matter, please feel free to give me a call at your convenience.

Very truly yours,

James M. Clabby
Project Manager
